ABOUT ME :

Hello! My name is Megan Figlioli and I am a special instructor with Early Intervention Specialists. I recently graduated from Maryville University in December 2022 with my bachelor's degree in Communication Sciences and Disorders (Speech Therapy). I will eventually be on my way towards getting my Master's degree In Speech Pathology. I have previous experience working with children in the preschool/daycare settings and working with the LIU in an autistic support classroom. I am very passionate about helping children reach their full potential and empowering families in the process. In my free time, I enjoy spending time with my son and family, reading, being outdoors, going to the beach, going to sprint car races, going camping, and watching movies.
